

CHECKLIST FOR

BESS2 VPP / DEMAND RESPONSE

All participating retailers, DRAs and representatives must be inducted into the Greenbank Program BEFORE undertaking BESS2 activities. Required site photos must be captured through the Greenbank App where applicable.

PARTNER/DRA CHECKLIST

SIMPLY CHECK IT OFF AS YOU GO!

Site & Battery Evidence

- Current electricity bill showing account holder, NMI and site address
- For small business – electricity bill showing business details and annual consumption / sufficient usage information to establish consumption below 100 MWh per year
- Geo-tagged photo of existing battery installed at the site
- Battery compliance plate showing make, model and serial number
- Evidence battery meets applicable approved-product requirements
- Evidence of original battery installation date – preferably CCEW, original invoice or other reliable installation record

VPP / DRA Requirements

- Signed demand response contract
- Contract signed by the electricity account holder for the NMI
- Contract is for a minimum of 12 months
- DRA / counterparty clearly identified
- Successful battery onboarding evidence
- Evidence battery has responded to a remotely provided DRA command – e.g. ping, activation or dispatch response

Customer Signatures Required

- BESS2 Capacity Holder Nomination completed in accordance with the BESS2 Nomination Specification
- For implementations from 1 July 2026, nomination must be completed within 90 days of the Implementation Date
